

The sky's the limit with this airport's switch to a scalable data transfer solution

 **Industry:**
Airports & Aviation

 **Product:**
Fortra's Globalscape EFT

 **Solution:**
Managed File Transfer

THE CHALLENGE

A major international airport needed to replace a legacy file transfer solution that was costing lots of time and money to maintain. The legacy solution was used as their core system, managing access as well as facilitating file manipulation and distribution. They needed a scalable enterprise file transfer solution capable of managing hundreds of accounts and thousands of transfers, with expertise from HANDD to successfully migrate their data within strict deadlines.

THE SOLUTION

Fortra's Globalscape EFT is a flexible and feature-rich enterprise secure file transfer solution. It was chosen as the preferred product after proving it could enable the customer to mimic both the functionality and projects in their legacy product within the EFT server, whilst future-proofing their growing data transfer needs. The solution demonstrated powerful automation, security, and collaboration, whilst minimally impacting ongoing operations during the transition period.

THE BENEFITS

By replacing their legacy file transfer platform, our customer is now able to enhance its ability to handle the movement of urgent and sensitive data, both within and outside its organisation. Technical expertise from HANDD has given the airport the ability to incorporate complex requests within EFT by building bespoke workflow automation into the platform, enabling the evolving demands from their 3rd party partners to be met with greater ease and reliability.
